### TIME SPACE EXISTENCE

The fourth edition of the biennial architecture exhibition "TIME SPACE EXISTENCE" presents a wide selection of works from architects, photographers, sculptors and universities from all over the world. In addition, projects realized in cooperation with institutions and museums.

The participating architects and artists come from diverse cultural backgrounds and different career stages, i.e. established architects next to professionals whose works might be less known. What they have in common is their dedication to architecture in the broadest sense of their profession. The exhibition shows a vast spectrum of presentations (models, concepts, research outcomes, thoughts, dreams and ideas), placing classical architectural installations in dialogue with surprising artistic elements.

## **RESEARCH AND DIALOGUE**

The topic TIME SPACE EXISTENCE gives the possibility for each architect to focus on these fundamental existential questions, creating an extraordinary combination of projects and approaches. By combining projects from architecture studios with works of architecture photography and sculpture, the exhibition becomes a dialogue between current developments, ideas and thoughts in art and architecture, highlighting the philosophical concepts of Time, Space and Existence.

We focus significantly on future developments. International Universities such as North Carolina State University, ETH Zürich- Singapore University of Technology and Design, Cincinnati, Buffalo, ENSA Strasbourg, Oklahoma, TU Delft, Syracuse, Victoria University New Zealand and Monash University Australia will present their research projects.

In addition, we will host the Mies van der Rohe Foundation with the YTAA Award. Professors, students and researchers will enrich our exhibition with open lectures and conferences often in cooperation with the European Cultural Academy. Besides participations by architects such as Curtis Fentress, Fumihiko Maki, Odile Decq, Ideal Spaces, Richard Meier, Mark Harris, Jean-Paul Viguier, Nikken Sekkei, SOM and Kengo Kuma, we will present a monumental project by Daniel Libeskind.
